Jatin Maurya

+91 70690 13316 | mauryajatin45@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

A detail-oriented and innovative web developer with expertise in full-stack development. Proficient in creating responsive, user-centric applications using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB. Passionate about learning new technologies, solving complex problems, and delivering high-quality, impactful solutions in collaborative environments.

Education

SILVER OAK UNIVERSITY   9.30 CGPA
Bachelor of Computer Application   2023-2026

- Participated in technical seminars to stay updated with industry trends.
- Attended Multiple Hackathons and multiple workshops on web development and UI/UX.

Projects

1. **VLC Media Player Web Clone ([Source code](#)) | HTML, CSS, JavaScript**
   - Developed a lightweight, modern web-based media player that allows users to upload, play, and control video files directly in their browser.
   - Integrated essential playback controls, Fullscreen mode, and customizable keyboard shortcuts to enhance user experience.
2. **Airbnb Clone ([Source code](#)) | Node.js, Express.js, MongoDB, EJS**
   - Created a full-stack Airbnb clone that allows users to create, manage, and book listings.
   - Implemented features like user authentication, image uploads (Cloudinary), location-based search (Mapbox), and a review system.
3. **CareerCraft – Career Development Platform ([Source code](#)) | Node.js, Express.js, MongoDB, EJS, Gemini AI**
   - Built and maintained backend architecture using Node.js, Express.js, and MongoDB for a career development platform.
   - Integrated Google Gemini AI to power personalized career advice, skill assessments, an AI-driven resume builder, and feedback system.
   - Developed a custom interview preparation module with role-specific questions, company insights, and mock interviews.

Achievements

- **2nd Prize – SOUIVTHON Hackathon (Silver Oak University):** Developed an innovative AI-driven online proctoring solution featuring tab switching detection, live camera monitoring, and automated exam submission.
- Actively participated in several Intercollege and Intra College hackathons, honing problem-solving and teamwork skills.

Work Experience

Web Development [1 Month]   Prodigy Infotech (remote)

- Developed and optimized a responsive landing page, a stopwatch app, a Tic Tac Toe game, and a weather app using HTML, CSS, and JavaScript.
- Gained hands-on experience in building functional, user-friendly applications, and enhancing web development skills.

Technical Skills

Programming Languages: C, C++, Java, Dart, Python.
Web Technologies: HTML, CSS, JavaScript, Bootstrap, Node.js, Express.js, MongoDB.
Frameworks & Libraries: Flutter, React, EJS.
Tools: Git, GitHub, VSCode.

Additional Skills

- **Soft Skills:** Strong communication, collaboration, problem-solving, and time management skills.
- **UI/UX Design:** Adept at creating engaging and intuitive user interfaces.
- **Continuous Learning:** Regularly attends workshops and seminars to stay updated with emerging technologies.
